

Fan Series S48Z

Space is one of the most critical requirements in mobile applications. Contrary to other sickle bladed profiles our newly developed S48Z with its stiff design needs less space in axial depth, yet manages to keep noise emission to an absolute minimum.

Hub Size Max Ø [mm]	3	4	5	6	7	8	9	12	16
	914	914	879	914	920	1000	934	1014	1109

Agriculture & Forestry Machinery

Construction Machinery & Compressors

Rail Applications

Wind Power Generation

Lowest noise emission values with a narrow axial depth.

Extreme stiff blade profile for high pressure resistance.

The S48Z blade profile for minimum deflection is 30% stiffer compared to competitor blades.

Blade material **PAG**
