

FAN SERIES
S16H

The exceptionally compact dimensions of the S16H blade profile makes this fan series the first choice for applications with very limited space. The lightweight sickle blade can fit in extremely compact cooling packages that are becoming more widespread due to cramped engine bays and ever stricter regulations.

Hub Size Max Ø [mm]	3 627	6 656	8 693	10 731	10-202* 761	11* 805	12 765	14 801	* Hubs designed for assembly on clutches.

Tractors

Municipal Vehicles

Pavers

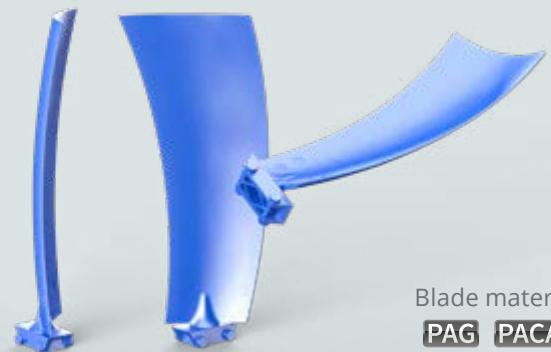

Rollers & Compactors

High performance allows lower rotation speeds to minimize the noise emissions and reduce fuel consumption

Compact design for cramped engine bays

The S16H can deliver high airflow and pressure to effectively cool engines with compact cooling packages. The light weight and compact blades are also ideal for viscous clutch applications.

Blade material
PAG PACAS
